

PROTECT THE Sharks OF FIJI

Scalloped Hammerhead Shark
Sphyrna lewini
Endangered**

Whitetip Reef Shark
Triaenodon obesus
Near Threatened**

Oceanic Whitetip Shark
Carcharhinus longimanus
Vulnerable**

Tiger Shark
Galeocerdo cuvier
Near Threatened**

Grey Reef Shark
Carcharhinus amblyrhynchos
Near Threatened**

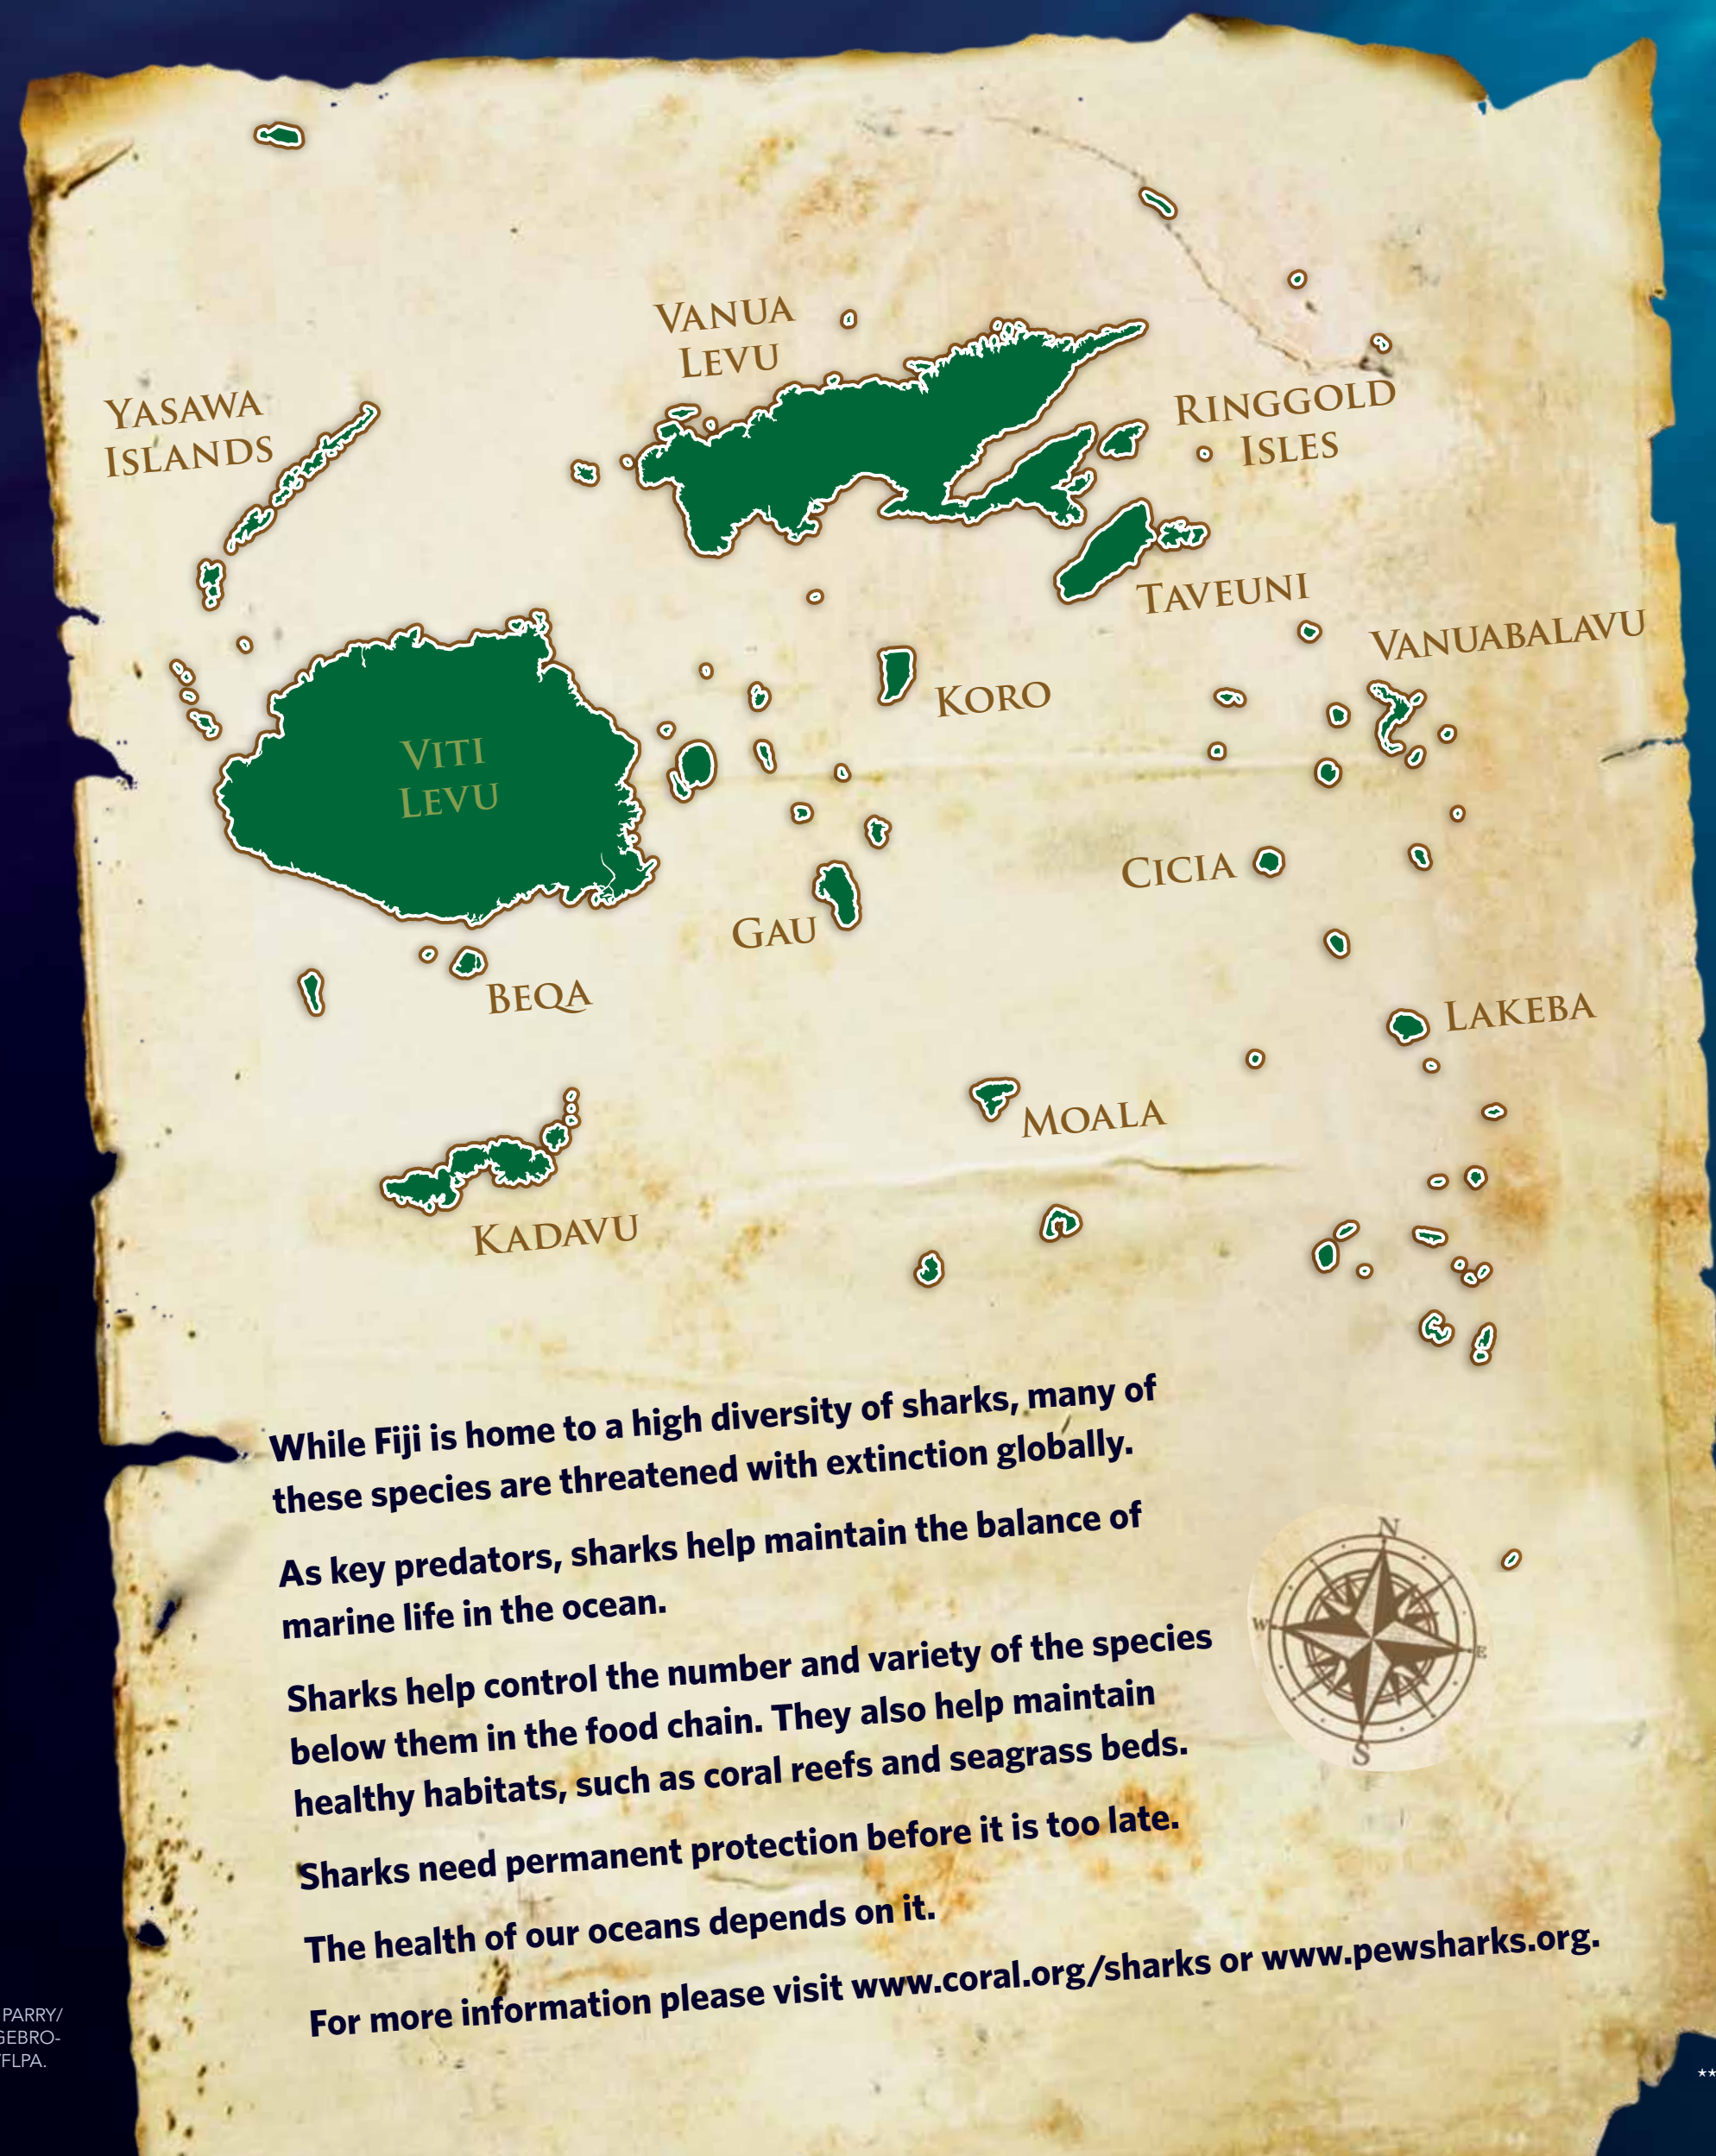

Tawny Nurse Shark
Nebrius ferrugineus
Vulnerable**

Whale Shark
Rhincodon typus
Vulnerable**

Blacktip Reef Shark
Carcharhinus melanopterus
Near Threatened**

While Fiji is home to a high diversity of sharks, many of these species are threatened with extinction globally.

As key predators, sharks help maintain the balance of marine life in the ocean.

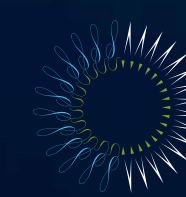

Sharks help control the number and variety of the species below them in the food chain. They also help maintain healthy habitats, such as coral reefs and seagrass beds.

Sharks need permanent protection before it is too late.

The health of our oceans depends on it.

For more information please visit www.coral.org/sharks or www.pewsharks.org.
