

# Maui, Hawai'i Highlights

Restoring Wahikuli Watershed with Native Plants

## Restored 1.7 acres of watershed

- 184** sediment traps installed
- 3,800+** native plants planted  
(including 24 species!)
- 31.9** tons of sediment trapped

## Volunteers

- 670+** volunteers engaged
- 127** outreach events completed
- 3,376** volunteer hours donated

## Native Plant Benefits

- Preserve biodiversity and create wildlife habitat and food
- Stabilize soil to protect against erosion and improve soil health
- Replenish groundwater sources and promote drought-tolerance
- Reduce the threat of wildfires
- Reduce spread of invasive species
- More resilient to a changing climate
